Market Software 2.0

6 · Deep Learning

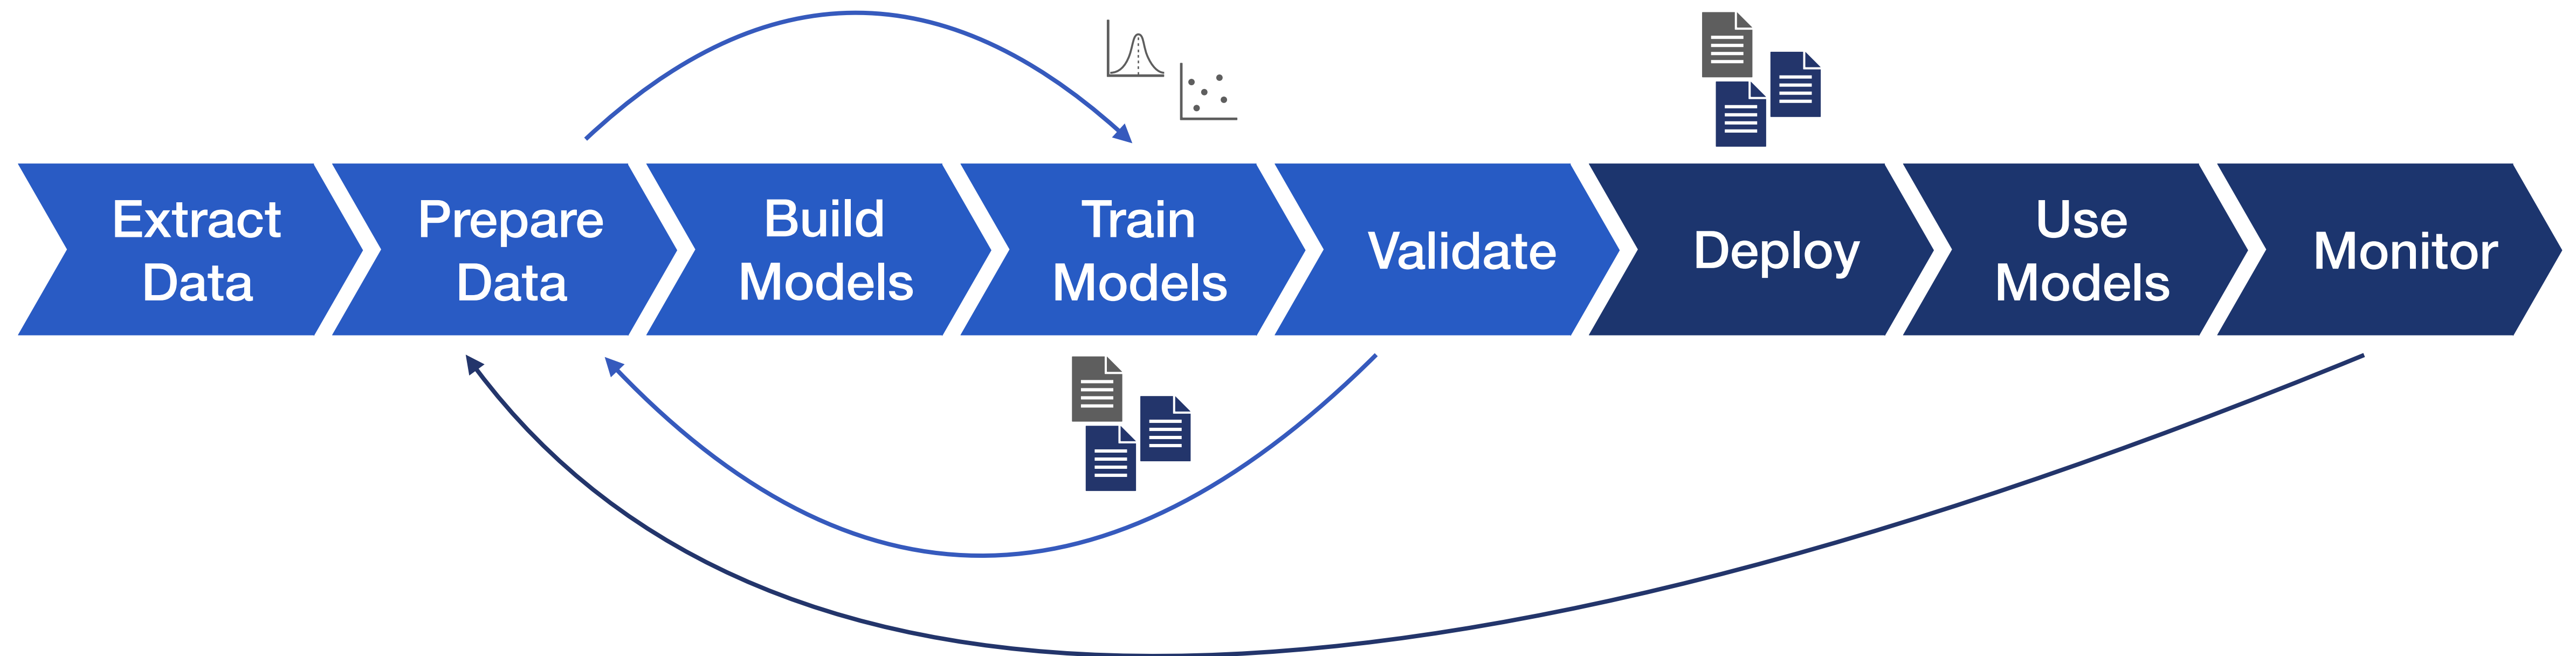

Deep Learning Is Software 2.0

Big Ideas Report 2021, ARK Investment Management LLC
<https://ark-invest.com/big-ideas-2021/>

PROBLEM

Machine learning is an iterative process

“How we connect each steps: copying text files, large folders, and executing ad-hoc scripts”

SOLUTION

Use PrimeHub to streamline MLOps workflow

Data Engineer

Data Scientist

Biz Analyst

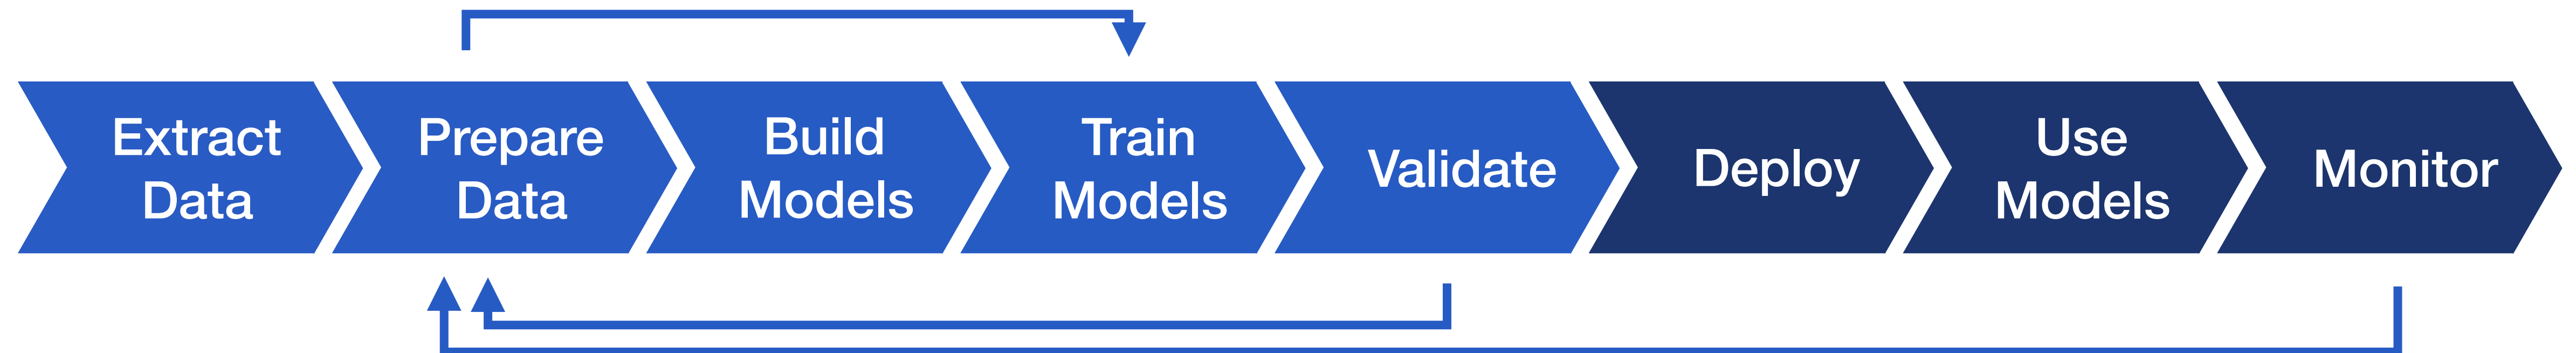

DevOps

App Engineer

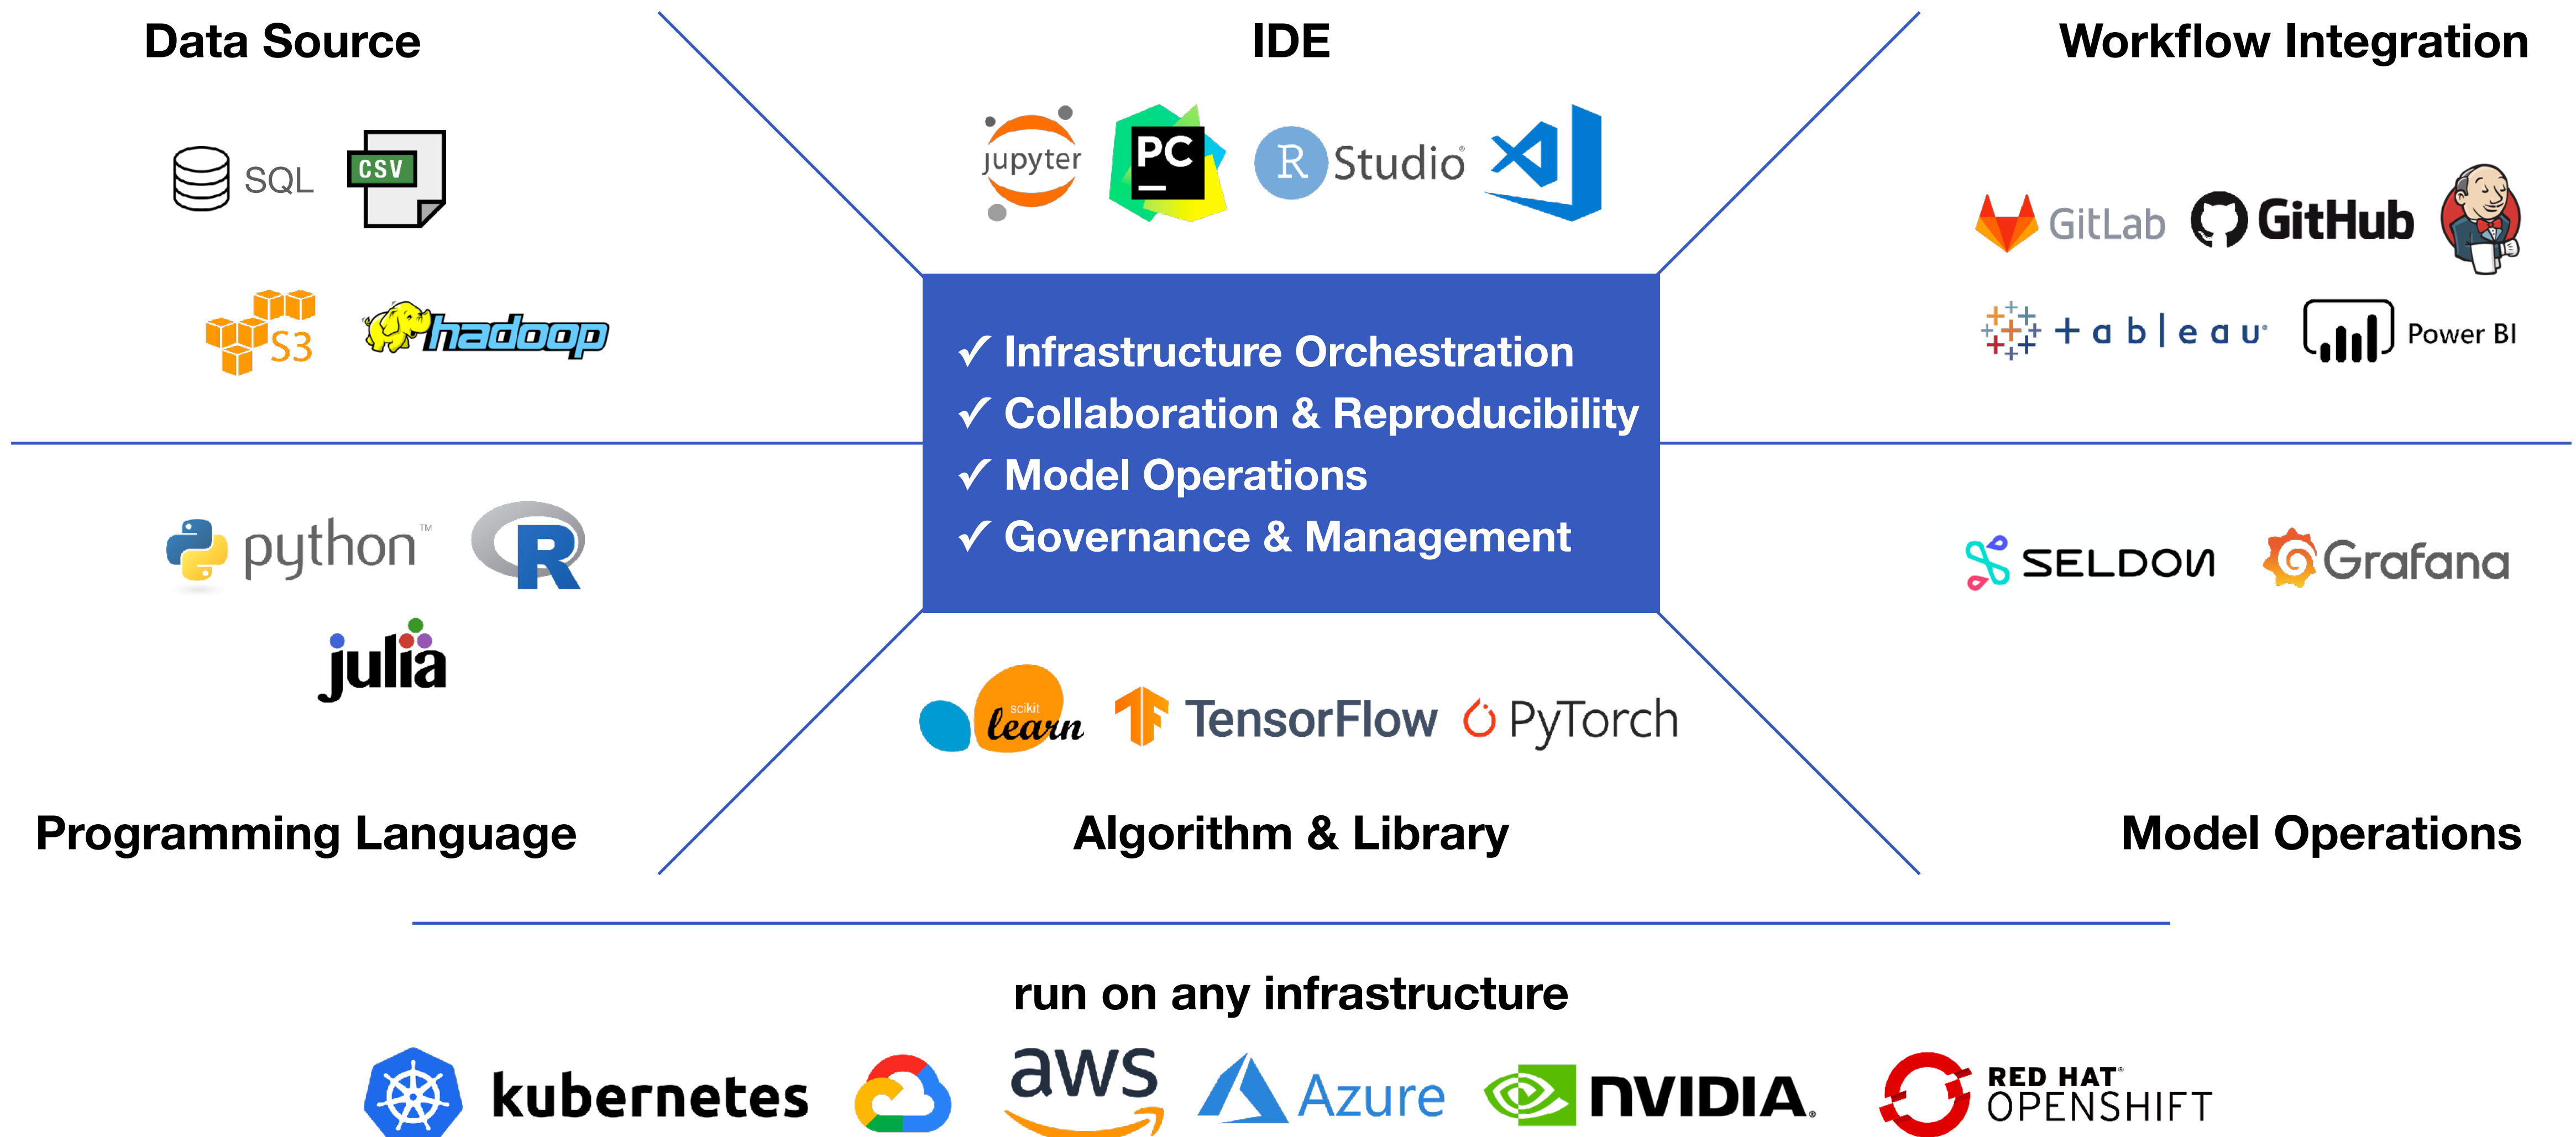

SRE

PrimeHub

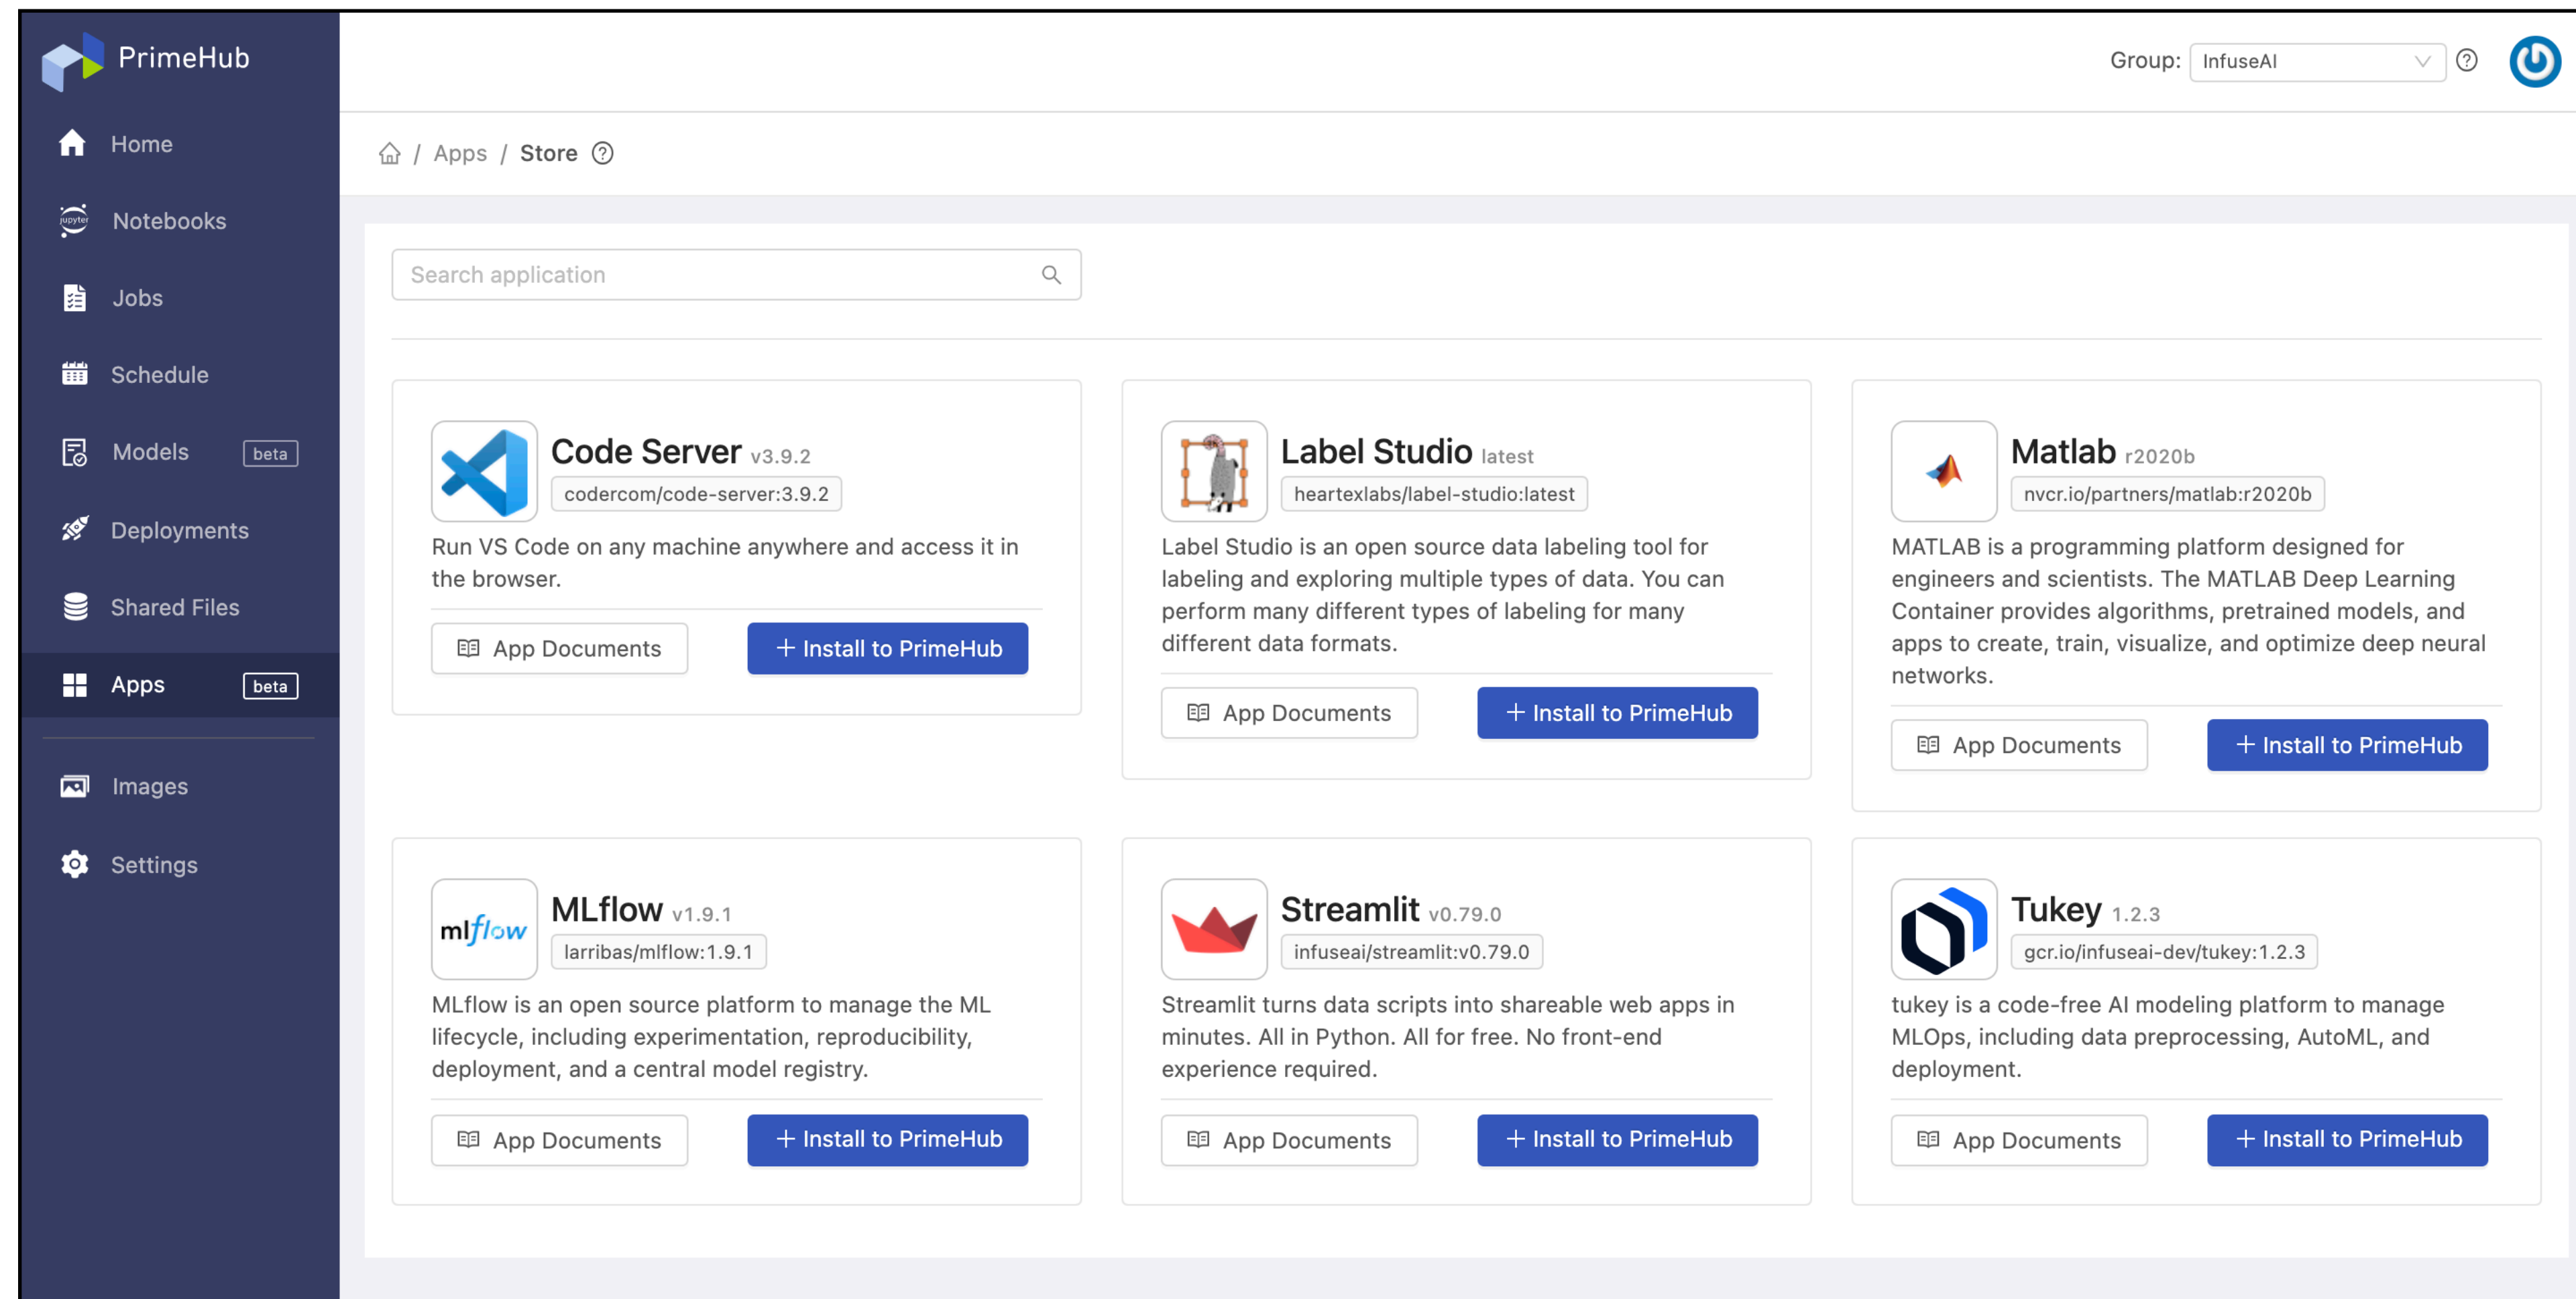

SOLUTION

PrimeHub MLOps Platform: Open Architecture

SOLUTION

PrimeHub Apps: integrate 3rd-party tools

Competition

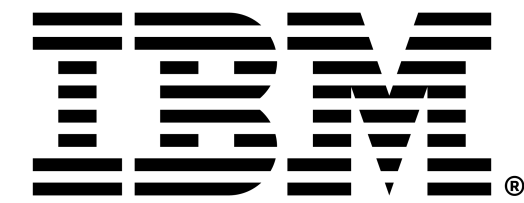

ML infrastructure,
not MLOps platform

Paperspace

“Requires Data Scientists to fit
into the system”

Monolith Solutions

“Requires Your Organization to fit
into the System”

Point solutions

“You still need to stitch
multiple systems together by yourself”

Case Study

Chi Mei Medical Center

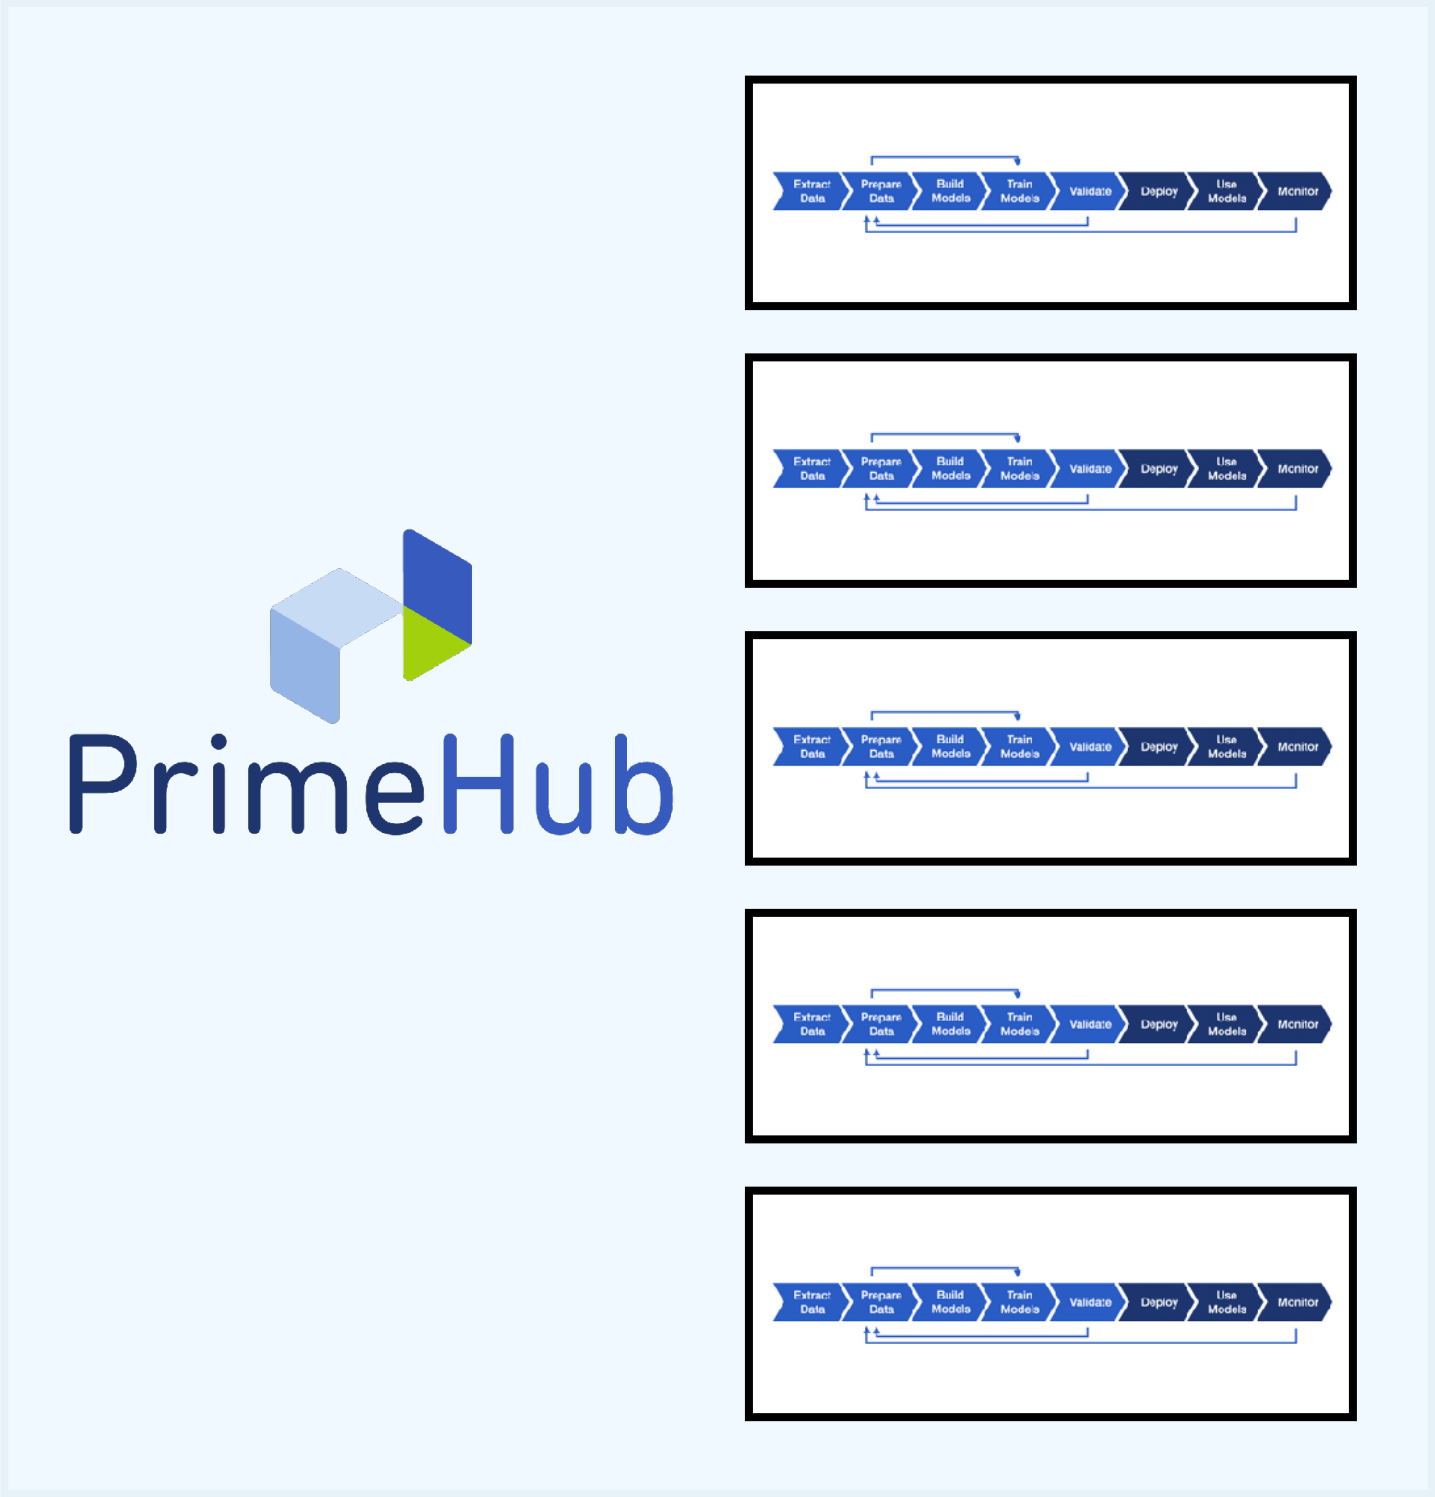

Patients complication and death risks assessment by AI in ER, making predictions about high-risk diseases for aged, including influenza. Helps to manage the ER capacity planning during COVID-19.

"It used to take **5~6 work days** to communicate, now **we can deploy the model within 1 hour after training**" – **Director of AI Center**

SOLUTION

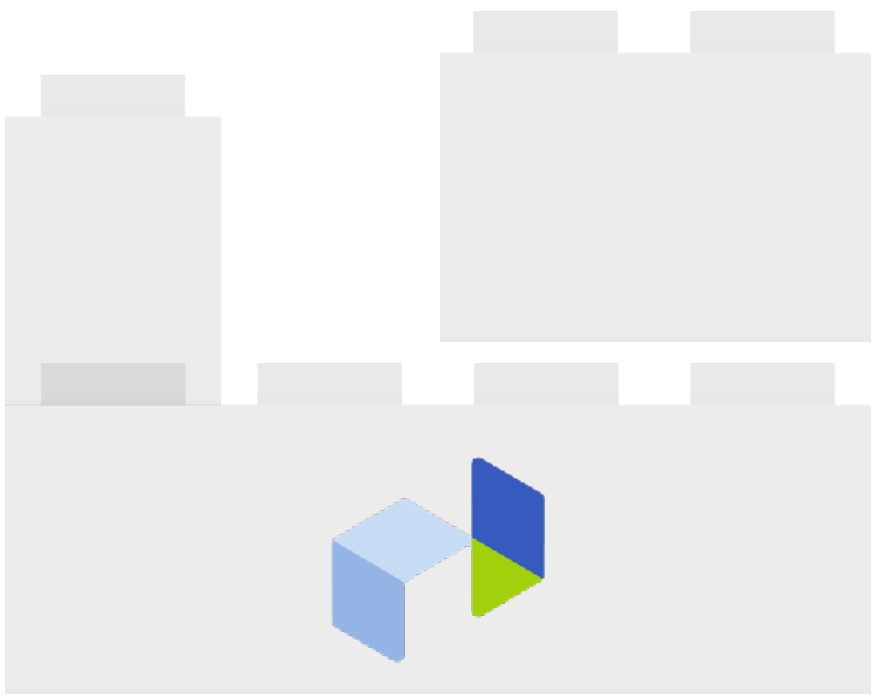

Our Benefits

Better
Scale AI development

Faster
Deploy model in hours, not days

API & Apps
automate workflow
